

GABRIEL ABRAHAM SINGBEH

Web Developer

Naples, Italy, +393491961145, singbehgabriel@gmail.com, [LinkedIn](#), [GitHub](#), [Portfolio Website](#)

Certified web developer with a two-year degree in Computer Science. Creative, detail-oriented problem-solver, enthusiastic learner, and adept at communicating complex concepts. Critical thinker with the ability to quickly analyze facts and form a judgment while keeping an open-minded, empathetic, and collaborative attitude.

SELECTED PROJECTS

Myflix Movie Application (Case study)

- Incorporates registration, log-in, search, and Favorites list functions
- Built server-side component of a movies application by creating a RESTful API using Node.js and Express
- Implemented basic HTTP authentication for initial login requests and JWT authorization for subsequent logins, with a state-based router to navigate between views and Redux for state management

Pokédex Application

- Built using HTML, CSS, and JavaScript
- Upon clicking, each Pokémon card(s) opens a modal with a picture and basic information about each Pokémon
- All information is loaded via the Pokédex API from an external database

Meet Application

- Built with a serverless progressive web application (PWA) and a React that showcases upcoming events by city
- Used a test-driven development (TDD) approach by writing test scenarios with Gherkin syntax
- Set up an authorization server on AWS Lambda for issuing OAuth2 tokens that allow the user to fetch data from the Google Calendar API

EDUCATION

Certificate in Full Stack Web Development, (2023, CareerFoundry).

- Intense certificate program in web development that included in-depth training in Front-end and Back-end frameworks

Associate degree in computer science, 2023.

- Continuing studies towards bachelor's degree in computer science
