Summary

Web developer with a background in IT, teaching, and advising. Experience in professional communication and problem-solving. Creative, loves paying attention to details, with a firm desire to learn new things, and adept at communicating complex concepts. Highly skilled in critical thinking with the ability to analyze facts and form a judgment while upholding an open-minded, empathetic, and collaborative spirit.

Projects

Myflix Movie Application, CareerFoundry

2021 – 2022

- Created with features for registering and logging into the app, searching for movies, and adding the same to the favorite list.
- Built the server-side component of a “movies” web application by creating a RESTful API using Node.js and Express.
- Implemented basic HTTP authentication for initial login requests and JWT authorization for subsequent requests.
- Implemented a state-based router to navigate between views and Redux for state management

Pokédex App, CareerFoundry

2021 – 2022

- The application was built using HTML, CSS, and JavaScript.
- The app allows the user to click on each Pokemon name or button.
- Upon clicking, each Pokemon card(s) opens a modal with a picture of the Pokemon as well as basic information about that Pokemon, such as name, height, types, and abilities.
- All information for the Pokemon is loaded via the Pokedex API from an external database

Meet Application, CareerFoundry

2021 – 2022

- The app was built with a serverless progressive web application (PWA) and a React that showcases upcoming events by city.
- Used a test-driven development (TDD) approach by writing test scenarios with Gherkin syntax to implement feature-specific tests.
- Set up an authorization server on AWS Lambda for issuing OAuth2 tokens that allow the user to fetch data from the Google Calendar API.

Chat App, CareerFoundry

2021 – 2022

- Used React Native to build a mobile chat app that allows users to share text messages and media files.
- Used Firebase's Cloud Firestore to store data and ensure real-time transfer to the user.
- Developed using open source tool EXPO
- Implement Android Emulator and IOS Simulators for app interaction

Education

BA in Biblical Theology , Faith Bible Institute

2017 – 2020

Graduated with 4.0

Associate degree in Computer Science, University of the People

2020 – OCTOBER 2023
